Neha Amina Riyaz
Computer Science

Creative and detail-oriented full-stack developer with a passion for building visually appealing and highly functional web applications. Skilled in both front-end and back-end development, with experience deploying scalable solutions to the cloud. Eager to collaborate with cross-functional teams to deliver seamless digital experiences while continuously learning and adapting to emerging technologies.

Educational Background

Federal Institute of Science and Technology,Angamaly

Bachelor of technology in Computer Science and Design
2022-2026

- CGPA: 8.65

Noble Public School,Malappuram

Class XII
2020-2021

- percentage: 90%

Ace Public School,Malappuram

Class X
2018-2019

- percentage: 96.2%

Internships

Front end Application Development using Angular

NeST Digital Kakkanad- Frontend Developer Intern
16 Dec 2024 - 20 Dec 2025

- Learned and implemented Angular for frontend development.
- Developed a personal portfolio website showcasing skills and projects.
- Built a travel website with dynamic UI components and responsive design.
- Created an eCommerce website with product listings, cart functionality, and user authentication.
- Gained experience in HTML, CSS, TypeScript, and API integration for web applications.

Certificates

- Product Design using AR- Nit Calicut
- Galactic problem solver-Nasa Hackathon
- Bridge Program-Carestack
- Data Analytics with Python - CSRBOX with IBM
- Google Analytics - Google skillshare
- DevOps Engineer - oneroadmap
- Ai Model Building - LetsUpgrade
- UI/UX Design - IEEE Student Branch

Skills

Technical Skills

- Web Design
- UI/UX
- Visual Design
- Documenattion
- Web Development
- Cloud Computing

Tools/Sofware

- Figma
- Unity
- Git
- Visual Studio Code
- Docker
- AWS

Programming languages/ Technologies

- Java
- C
- Python
- HTML
- CSS
- Javascript
- React
- Angular

Languages

- English (Fluent)
- Malayalam (Fluent)
- Hindi(Conversational)

Additional Information

- Acm Member
- Placement cell volunteer

Projects

APInspector - Focused API Testing & Schema Validation

- Built APInspector, a custom API testing application designed to validate the functionality, performance, and security of RESTful APIs.
- The tool enables users to define and execute test cases while inspecting live responses. It supports validation of API interactions with PostgreSQL to ensure accurate data handling and consistency.
- APInspector includes a status code analysis module to evaluate HTTP responses across various scenarios and offers test case tracking to ensure comprehensive coverage and reporting.
- The application is deployed on AWS and is accessible via a public URL, enabling easy access and real-time usage

DiscoverIndia - A Smart Exploration Engine

- Developed DiscoverIndia, a full-stack travel recommendation website that suggests destinations, activities, and experiences based on user preferences using a built-in machine learning model.
- Designed the frontend using Angular, HTML, CSS, and Bootstrap to deliver a dynamic and responsive user interface.
- Built RESTful APIs with Node.js and Express to manage user authentication, travel data, and booking functionality.
- Used MongoDB for backend database management, enabling flexible schema design and efficient CRUD operations.
- Integrated a machine learning model to analyze user input and generate personalized travel recommendations, enhancing user engagement and experience.
